Precautions

■ Correct Use

Grounding (Lock Pin Grounding Fixture)

To ground, provide copper foil around the Connector Attachment hole on the board, assemble the connector and grounding fixture, and dip in solder as shown below.

Insert the connector into the PCB and then simultaneously dip-solder the connector terminals and lock pin to the board.

Tightening Torque of Anchor and Grounding Fixture

If the anchor is secured to the connector, be sure to tighten it to a torque of 0.49 N·m.

Also, use a proper size tool to do this work.

Soldering - Automated Soldering Conditions (Jet Flow)

1. Soldering temperature: $250 \pm 5^\circ\text{C}$
2. Continuous soldering time: Within 5 s

Combination of hexagonal anchors for each connector (in post installation)
